

Table of Contents

Preface

Prologue

Plenary lecture

| | |
|---|---|
| Earth system models and mathematical remarks <i>J.L. Lions</i> | 1 |
|---|---|

Fluids

| | |
|--|----|
| h - p adaptive finite element methods in computational fluid dynamics <i>J.T. Oden and L. Demkowicz</i> | 11 |
|--|----|

| | |
|---|----|
| Laminar swirling flow and vortex breakdown in a pipe <i>A. Bottaro, I.L. Rhyming, M.B. Wehrli, F.S. Rys and P. Rys</i> | 41 |
|---|----|

| | |
|--|----|
| Numerical simulation of hypersonic viscous flow for the design of H-II orbiting plane (HOPE) <i>Y. Yamamoto</i> | 59 |
|--|----|

| | |
|--|----|
| Application of superconvergence to problems in the simulation of miscible displacement <i>R.E. Ewing, J. Shen and J. Wang</i> | 73 |
|--|----|

| | |
|---|----|
| An exploration of chemically reacting viscous hypersonic flow <i>J. Argyris, I.St. Doltsinis, H. Friz and J. Urban</i> | 85 |
|---|----|

| | |
|---|-----|
| Non-equilibrium hypersonic flow simulations using the second-order boundary layer equations <i>M.L. Sawley and S. Wüthrich</i> | 129 |
|---|-----|

| | |
|--|-----|
| A new finite element formulation for computational fluid dynamics: X. The compressible Euler and Navier-Stokes equations <i>F. Shakib, T.J.R. Hughes and Z. Johan</i> | 141 |
|--|-----|

| | |
|---|-----|
| Performance of turbulence models to predict supersonic boundary layer flows <i>F. Hanine and A. Kourta</i> | 221 |
|---|-----|

| | |
|---|-----|
| An information system for the numerical simulation of 3D Euler flows around aircraft <i>J.W. Boerstoeel and S.P. Spekreyse</i> | 237 |
|---|-----|

Structures

- On CAD-integrated structural topology and design optimization
N. Olhoff, M.P. Bendsøe and J. Rasmussen 259
- The COC algorithm, Part I: Cross-section optimization or sizing
G.I.N. Rozvany and M. Zhou 281
- The COC algorithm, Part II: Topological, geometrical and generalized shape optimization
M. Zhou and G.I.N. Rozvany 309
- Structural optimization of I.C. engines subjected to mechanical and thermal loads
B. Balasubramanian, M. Svoboda and W. Bauer 337
- A numerical model for buckling and growth of delaminations in composite laminates
B. Cochelin and M. Potier-Ferry 361

Dynamics

- Geometrical concepts and computational techniques of nonlinear dynamics
S. Foale and J.M.T. Thompson 381
- Rigid and flexible joint modelling in multibody dynamics using finite elements
A. Cardona, M. Geradin and D.B. Doan 395
- Defect-mediated turbulence
J. Lega 419

Applied physics

- Numerical study of high enthalpy flow in a plasma wind tunnel
T.H. Gogel, M. Auweter-Kurtz, T.M. Götz, E.W. Messerschmid, H.O. Schrade and P.C. Sleziona 425
- Vertical solidification of dendritic binary alloys
J.C. Heinrich, S. Felicelli and D.R. Poirier 435
- The Monte Carlo method in science and engineering: Theory and application
K.M. Decker 463

Computing and numerical methods

| | |
|---|-----|
| Integration of solid modeling and finite element generation <i>H.A. Kamel and L. Chen</i> | 485 |
| Studies on parallel processing for coupled field problems <i>I.St. Doltsinis and S. Nölting</i> | 497 |
| Parallelization of CFD codes <i>C.M. Bergman and J.B. Vos</i> | 523 |
| Fourier spectral method on ensemble architectures <i>R.B. Pelz</i> | 529 |
| Fast solver for plane potential problems with mixed boundary conditions <i>R. Haas and H. Brauchli</i> | 543 |
| Author Index | 557 |
| Subject Index | 561 |
| Instructions to Authors | 567 |
